# Encapsulating Shampoo & Bonnet

A fast acting, quick drying bonnet/spin cleaner which incorporates Certified's Encapsulating technology to bind the soil, which is then removed through daily vacuuming.

*Traditional detergents leave behind sticky residues that lead to rapid resoiling. But the **Structured By Nature** encapsulating detergent dries into a hard crystalline material that fractures off the carpet fiber during the dry vacuuming process. Therefore an important benefit of encapsulation is that any residue left behind is of a non-sticky nature, and consequently does not result in rapid resoiling.*

### Why Encapsulation?

- Leaves no harmful residue
- Prevents soil wicking
- No sticky residue
- No rinsing required
- Eliminates rapid re-soiling
- Carpets stay cleaner longer

**Economical** - Dramatic labor and chemical savings realized by the customer.

**Versatile** - Can be used with the latest low moisture equipment and also compatible with traditional carpet cleaning equipment

**DIRECTIONS:** Shake well before using. Test fabric in inconspicuous place for color fastness before using.

1. Prepare carpet for shampooing in a normal manner with vacuum or Certified® Pile Brush.

Add 16 oz. (473) of Structured By Nature™ Shampoo to 1 gallon (3.78 L) of water.

**ROTARY BRUSH** - Spray solution to carpet surface and agitate with rotary brush.

**BONNET CLEANING** - Bonnet may be either saturated with diluted solution or solution may be sprayed as a mist, ahead of machine.

2. Use furniture protectors under legs if furniture must be replaced before carpet is dry. Vacuum thoroughly when dry.

**UPHOLSTERY CLEANING:** Vacuum furniture thoroughly.

1. Add 16 oz. (473 mL) of Shampoo to every 1 gallon (3.78 L) of water.
2. Clean in normal manner with brush or sponge.
3. Wipe any excess foam from legs or other un-upholstered areas.
4. Finish all nap type coverings with soft brush combing in one direction.
5. Vacuum thoroughly when dry.

**NOTE:** Freezing will not affect cleaning power. Thaw, shake well and use.
