## ASSEMBLY INSTRUCTIONS

### ECONOMY LAUNDRY CART AND GARMENT RACK

**TOOLS REQUIRED:** Large standard (flat screwdriver), 3/4" socket-wrench & two-7/16" open end (or box end) wrenches.

**96B Cart and Basket Assembly:** With the base upside down insert each of the four casters through the respective hole and secure with the included wrench (if lock washers are provided they are not necessary) and tighten caster(s) with a 3/4" socket-wrench. With all four casters installed flip the base over and insure that the casters are secure.

Center basket on the base. Using the four slotted roundhead bolts (and nuts), provided, attach the basket to the base through the two center holes only in each metal strap in the bottom of the basket. If no rack is to be installed, tighten bolts securely. If rack is to be installed, leave finger tight and go to the next step.

**58 Double Pole Assembly:** Place the long rack tubes down through the inside basket and outside of the cart. Use four long hex head bolts and nuts to attach. Attach crossbar to top of rack using two short hex bolts and nuts. Tighten all bolts.

**Make sure that all bolts/nuts are tightened and secure before placing the cart into service.**

#### WARNING

- Do not remove carts from building.
  - Never allow children (or adults) to ride in or on carts.
  - Keep casters free of thread, lint, hair and other debris.
  - Be sure casters roll freely and turn easily at all times.
- If a caster does not roll properly, remove cart from service immediately.
- Place all loads in center of basket for balance.
  - Maximum cart capacity: 100E/T, 96B, 200F/S, 300G, 350E - 50 lbs.
