Certified **Protect-O™** is a water-based fluorochemical that provides an invisible, protective shield for new or just cleaned carpet and upholstery. **Protect-O™** makes carpet resistant to oily spills and wet or dry soil. Spills can be removed before soaking into the fiber. Treated carpet will last longer, clean easier and look better between cleanings with regular vacuuming and prompt attention to spills. Solvent free and safe. Dries quickly with no unpleasant odors.

DIRECTIONS FOR USE

Shake well before using. Test fabric in inconspicuous place for color fastness before using.

1. Use **Protect-O™** on new or just cleaned carpet.
2. **FOR DAMP** (just cleaned) **CARPET**, dilute 1 gallon **Protect-O™** (3.78 L) with 2 gallons (7.57 L) of water for application on 1,000 sq. ft. of average carpet. **FOR DRY OR DRIED CARPET**, dilute 1 gallon **Protect-O™** (3.78 L) with 4 gallons (15.14 L) of water for application on 1,000 sq. ft. average weight carpet.
3. Adjust spraying equipment to deliver 3 to 5 gallons (11.34 to 18.9 L) use solution for 1,000 sq. ft. in two passes, depending on whether carpet is damp or dry, and apply horizontally and vertically to assure uniform coverage.
4. Brush into nap lightly, finishing by brushing nap in one direction.
5. Use furniture protectors under legs on damp carpet.
6. Wipe off any **Protect-O™** sprayed on walls, molding, furniture legs, wood, or painted surfaces immediately.
7. Rinse spray equipment after use. Test for adequate and uniform application of **Protect-O™** by spilling a few drops of water over several places of treated, dried carpet. The water should bead up and remain on surface; if it soaks into fabric, additional application is recommended.

CARE OF TREATED CARPETS: Vacuum or use Certified Pile Brush for normal maintenance. If spills occur, they can normally be wiped up before they soak in and cause a stain. If spot or stain must be cleaned (shampoo or hot water extraction) Certified **Protect-O™** may be applied only over the area cleaned.
