

CERTIFIED®

Low foaming, economical cleaner for commercial carpet maintenance.

Bonnet Cleaner Concentrate

ULTRA BONNET

Spin Cleaner

pH 8-8.5

1:8

Certified® Ultra Bonnet cleaner is a concentrated cleaner for economical carpet maintenance. Heavily soiled commercial traffic areas can be maintained on a regular, even daily basis. Periodic extraction cleaning is recommended to prevent excessive soil build-up. For best results, prepare the carpet with a Certified® Model S Pile Brush and use Certified® Traffic Spotter-Pre-Spray on heavily soiled areas before bonnet cleaning. Ultra Bonnet is safe to use on all carpets.

Gallon 4/cs.	5 Gallon	55 Gallon Drum

DIRECTIONS FOR USE

Shake well before using. Test fabric in inconspicuous place for color fastness before using.

For Dip, Spray or Shower-Feed Methods

1. Dip the clean or freshly laundered bonnet pad into cleaning solution and wring out excess solution by hand.
2. Over a piece of test rug or plastic sheet, center the bonnet pad under the drive pad of the rotary machine and allow to rotate. When suds appear, the unit is ready for bonnet cleaning the carpet.
3. To avoid streaking, allow the bonnet pad to rotate in a circular pattern 1 1/2 times its diameter; overlapping each circle in blocks of 3 to 4 square feet.
4. Additional cleaning solution is added by dipping the bonnet pad in cleaning solution; by spraying the 3 or 4 feet squares ahead of the rotating bonnet with a power spray; or with a shower feed scrubber by releasing solution from the tank.
5. Check the bonnet frequently. Turn it over when it gets soiled and/or replace with clean, dipped and wrung out damp bonnet pads.
6. Finish by brushing carpet in one direction with nap brush to eliminate swirl marks. Use furniture protectors under legs of furniture replaced on damp carpet.
