After Rinse is a specially formulated fabric rinse for use on carpet and upholstery. It is a low pH solution that may be used as the final step in wet cleaning. **After Rinse** will remove any remaining residue, help prevent browning or yellowing and leave the fabric with a soft feel. As an added benefit, it will help prevent rapid resoiling. It is also ideal for most carpets and is especially recommended for oriental and all white or pastel colored synthetic carpets

DIRECTIONS FOR USE

Shake well before using. Test fabric in inconspicuous place for color fastness before using.

Spraying:

1. Add 4 to 6 fluid ounces (113.4 to 170 mL) of **After Rinse** to 1 gallon (3.78 L) of water.
2. Spray with an electric or pump type sprayer.
3. Repeat after drying if necessary.

Extraction:

1. To prepare carpet for jet extraction cleaning, vacuum or use the Model S Pile Brush to remove dry soil.
2. Add 4 ounces (113.4 mL) of **After Rinse** for each gallon (3.78 L) of water to solution tank as a stand alone rinse step.
3. Proceed in cleaning carpets.
4. Finish carpet with a nap brush.
5. Use furniture protectors under legs of furniture replaced on damp carpet. After using **After Rinse**, all mechanical equipment should be rinsed with plain water to prevent corrosion.
