

Environmentally Responsible

Encapsulating Carpet Spotter

Why Green

- Improve indoor air quality
 - Non-Toxic / Non-Caustic
 - Low VOC's
 - Biodegradable
 - Improved worker health and safety
 - Meets Environmental standards
- Nilodor will continue to do it's part to insure a safe and healthy environment for our generation and those to follow.

Quarts - **32SBN RTUSP** / 12 per case
 Ready-To-Use
 Diluted pH - 9-9.5

Why Encapsulation?

Detergents are a necessary element in carpet cleaning. Unfortunately, detergents can be sticky and may leave a residue if not completely removed from the carpet fibers. This residue will accumulate and lead to problem re-soiling, especially in traffic lanes and other heavily used areas.

Certified's Encapsulation polymer technology is a safe alternative to traditional detergent-based cleaners. These encapsulation polymers suspend the soil at the top of the carpet fibers, drying into a light, non-sticky crystalline which can be easily removed by normal vacuuming.

DIRECTIONS:

1. Test fabric in inconspicuous place for color fastness before using.
2. Wet with plain water.
3. Liberally apply Spotter to affected area.
4. Work chemical into carpet pile and blot with a clean white towel.
5. Rinse with clean water
6. Repeat if necessary.
7. Vacuum when completely dry.

NOTE: Freezing will not affect cleaning power. Thaw, shake well and use.

Formulated in Partnership with the Design for the Environment Program
 Approved for all carpets by The Carpet And Rug Institute
