

# PEST MANAGEMENT

PROTEAM VACUUMS PICK UP WHAT PESTICIDES LEAVE BEHIND

**ProTeam**  
Cleaning for Health® Since 1987

# INTEGRATED PEST MANAGEMENT STARTS HERE

**95%** of U.S. based professional pest management companies have encountered a bed bug infestation in the year.

Source: 2011 Bugs Without Borders Survey, National Pest Management Association & University of Kentucky

In any integrated pest management (IPM) system, a high-performance ProTeam vacuum is a vital tool. ProTeam vacuums combine high-powered suction with HEPA and exclusive Four Level® Filtration to capture and contain up to 99.97 percent of particulates down to 0.3 microns in size – including dead and live specimens, and allergens like cast skins and fecal matter.

**In the fight against pests, ProTeam vacuums simply work better.**

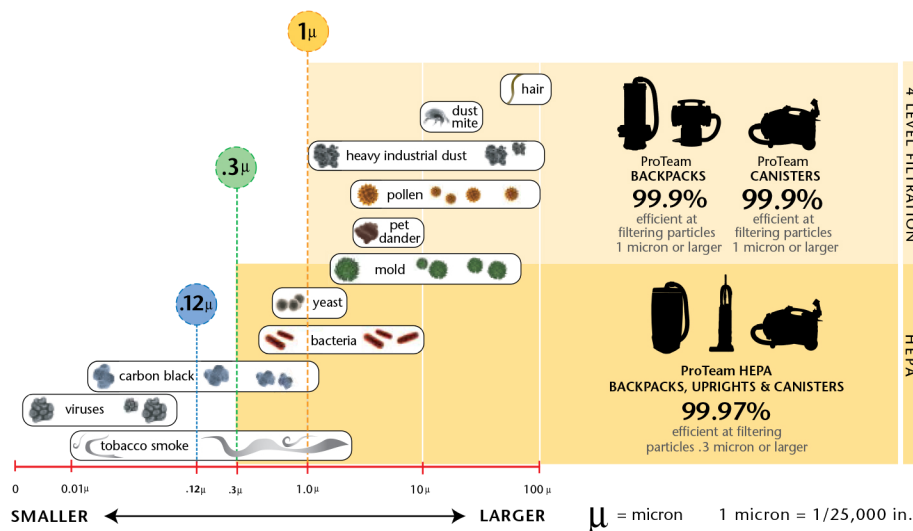

## FILTRATION. FILTRATION. FILTRATION.

ProTeam's exclusive HEPA and Four Level Filtration make pest management more efficient and ensure insect particulates stay out of the air.

### Cleaning for Health®

ProTeam's Unique Suction Cleaning Method

- **VACUUMS DESIGNED TO IMPROVE** indoor air quality.
- **LOW DECIBEL LEVELS REDUCE** noise pollution.

## Pest Buster.

Why do ProTeam backpack vacuums work better against pests? Count the ways.

- 1. Environmentally safe.** Using no chemicals or toxins, ProTeam vacuums permanently remove pests from a space.
- 2. Routine elimination.** ProTeam backpack vacuums allow cleaning workers to move through a space up to 3 times faster and 44 percent more effectively, so pest management becomes routine.
- 3. Immediate impact.** Instantly capture pests and contain the allergens, eggs and waste they leave behind.
- 4. Versatile control.** ProTeam's IPM toolkit and high-performance design can control a wide range of pests, including bed bugs, spiders, cockroaches, wasps, beetles, box elder bugs and more.

# RECOMMENDED PRODUCTS

AN ENVIRONMENTALLY-SAFE WAY TO EFFECTIVELY ELIMINATE PESTS

**ProTeam**  
Cleaning for Health® Since 1987

## SUPER COACH PRO™ 6

- Improved comfort and range of motion
- Increased filtration levels

## GOFREE® PRO

- Cordless efficiency
- Enhanced mobility

## LINEVACER®

- Certified HEPA
- Capture and containment of pests and fecal matter

## INFESTATION with High Performance Cleaning and Sustainability

Pests aren't simply a nuisance – they can severely affect your health and the health of those around you. This is why bug and insect prevention is critical in protecting homes, business, schools and any other place where human beings live, work or play from a pest infestation. Pest management practices are changing to include considerations like health, safety and sustainability.

ProTeam's Integrated Pest Management (IPM) vacuums are a vital tool in pest management as they instantly eliminate cockroaches, bees, dust mites, spiders and other objectionable bugs. An IPM system also removes allergens such as cast skins, fecal material, and dead and live specimens. It is important to reduce your exposure to such allergens.

## 103439 Integrated Pest Management Tool Kit includes:

102361 – Straight Plastic Wand

102399 – Vibrating Upholstery Tool

102663 – Mesh Bag

102684 – Electronic  
Cleaning Kit

103089 – Dust Brush

103099 – Adapter Cuff

103505 – Curved Wand

103523 – Crevice Tool (Flexi-Clean)

106343 – Chrome Telescoping Wand

106709 – Combination Floor Tool

# STOP THE INVASION

## PROPER PEST CONTROL

will help prevent or remove pests that can trigger asthma.

With the rise of bed bugs, cockroaches and other invasive pests, ProTeam vacuums offer the power, suction, maneuverability and filtration to stop them dead in their tracks.

## PROOF POSITIVE

Stoy Hedges

Pest Control Technical Expert, Terminix, Memphis, Tennessee

"One myth is that only people who keep dirty homes get bed bugs. Not true, because poor sanitation practices have nothing to do with bed bugs," Hedges states. "If you think you've found bed bugs, call an experienced professional to come confirm. The most effective mode of eliminating bed bugs is to integrate multiple techniques in the overall control program, plus gaining client cooperation in preparing for the service."

"IPM essentially employs non-chemical techniques and strategies together with treatments to control a pest," Hedges noted. Vacuuming, especially with a high-performance, high-filtration backpack vacuum, "Results in immediate population reductions."

The effective pest management backpack vacuum features high-powered suction and multi-level filtration for a frequently lethal combination to pests. ProTeam offers Four Level® Filtration with HEPA to capture and contain up to 99.97 percent of particulates down to 0.3 microns in size.

ProTeam also offers an IPM tool kit for the Super Coach Pro 6 that includes attachment features like a vibrating tool for uprooting pests from mattresses and floors, and wands for reaching into tight crevices.

"A backpack vacuum provides convenience and ease of use," Hedges commented. "The ProTeam vacuum provides excellent suction for removal of bed bugs from surfaces and the HEPA filter helps capture any potential allergens dislodged from surfaces during the process."
