SANITIZER

- **Sanitergent™** cleans and sanitizes in one procedure.
- **Sanitergent™** saves labor and reduces the need for multiple cleaning products.
- **Sanitergent™** will clean and sanitize equipment in accordance with local, state, and federal standards.
- **Sanitergent™** does not leave a toxic residue.
- **Sanitergent™** is FDA approved and EPA-registered as a no-rinse sanitizer.
- Machinery properly cleaned with **Sanitergent™** will consistently deliver a high-quality product.

Sanitergent™ Cleaner/Sanitizer can be used in dairies, hospitals, breweries, restaurants, and food processing plants. It is particularly effective on surfaces which contact food. It is recommended for use on hard (nonporous) surfaces or on dishes, glasses, food processing equipment, or utensils including dairy and brewery equipment or utensils that need a strong sanitizer treatment. This material is very effective on table tops, tanks, vats, floors, walls, dishes, glasses, metallic utensils, and milkshake and soft serve machines.

Directions For Use ST-764

It may be necessary to remove gross filth and heavy soil from surface by a pre-scrape, pre-flush and where necessary, a pre-soak treatment. Dissolve 0.10 oz. of **Sanitergent™ Cleaner/Sanitizer** per 32 ounces of water to give a solution containing 100 ppm available chlorine. Apply the sanitizing solution to the surface to be sanitized spray to wet all surfaces thoroughly. Let stand at least one minute. Air dry. The sanitizing solution should be used promptly after mixing. It should be prepared daily or more often if it becomes dilute or soiled. If the solution is allowed to stand and/or continued use shows the level of chlorine has not been maintained, add more **Sanitergent™ Cleaner/Sanitizer** to maintain a use solution of 100 ppm available chlorine.

Ingredients

ACTIVE INGREDIENT

Sodium dichloro-s-triazinetriene dihydrate 6%

INERT INGREDIENTS 94%
