

Portable Evaporative Cooler

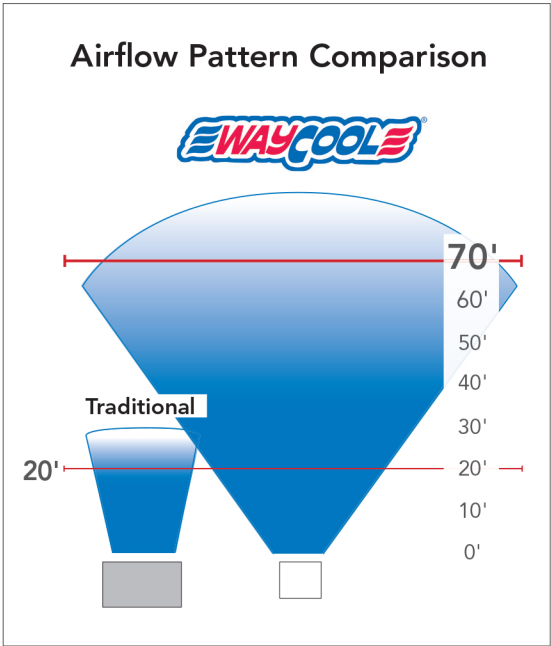

WayCool's air velocity makes the difference. The proprietary design of WayCool blows cooled air in a high speed, oscillating stream. The air velocity at the nozzle is 28 mph and this cool channel of air is still felt at 3 mph over 70 feet away. The unique design and powerful performance makes it top of class for evaporative coolers.

Why a WayCool Evaporative Cooler is better

	Schaefer WayCool	Traditional Evaporative Cooler
Feel cool air movement at 70 feet	✓	
Feel cool air movement at 20 feet	✓	✓
Proprietary oscillating top (greater coverage)	✓	
Protective grates (extended pad life)	✓	
Compact footprint	✓	
Quiet blower fan	✓	
Hose connect for continuous use	✓	✓
Built in water reservoir (standalone use)	✓	Some
Water gauge level	✓	Some
Pump auto shut-off (prevent damage)	✓	Some
Cools up to 30°F	✓	✓
Cools at a fraction of the cost of A/C	✓	✓
Available in white or gray	✓	
Parts available	✓	Some
American made	✓	Some

WayCool cools an area up to 4700 square feet
