

DESCRIPTION

This product keeps portable toilets odor-free using natural bacteria and enzyme cultures to quickly and efficiently digest organic waste. Without using heavy perfumes and deodorants, this product aggressively destroys strong malodors by rapidly liquefying solid waste material.

To keep holding tanks smelling fresh, this product leaves behind the sweet but light fragrance of bubble gum. When temperatures rise, the bacteria and enzymes begin multiplying, thus speeding up decomposition.

Since this product is also 100% biodegradable, all digested waste can be safely processed at any conventional waste treatment facility.

Avoid breathing spray. Wash thoroughly after handling. Wear eye protection, protective gloves, protective clothing. In case of inadequate ventilation wear respiratory protection.

IF INHALED: Remove person to fresh air and keep comfortable for breathing. **IF IN EYES:** Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention. If experiencing respiratory symptoms: Call a poison center/doctor.

Dispose of contents/container to comply with local/regional/national/international regulations.

*For industrial and commercial use only.
For additional information, see Safety Data Sheet.*

TOTAL SOLUTIONS®

BACTERIAL/ENZYME DIGESTANTS
