**Care and Construction**  
**Acrylic****Material Characteristics****Designed for Durable, Transparent Applications**

Acrylic is a clear, impact and weather-resistant material consisting of methyl methacrylate polymers (PMMA). It is often used as a glass replacement due to its strength and transparency.

Clear optical characteristics mean the viewer can see the content, read text, and see true colors through the material.

**Care and Cleaning**

Most cleaning chemicals do not weaken the surface or cause damage to the material. Suggested cleaning method is to use a soft cloth, warm water, and mild soap.

Do not place in direct sun.
