

Care and Construction

Polycarbonate Plastic

Material Characteristics

Designed for Long-Term, Heavy-Duty Applications

Polycarbonate plastic is a polymer comprised of Bisphenol A and phosgene, which makes it shatter resistant and provides an excellent combination of strength, rigidity, and toughness.

This polycarbonate plastic is a clear, lightweight, tough, dimensionally stable thermoplastic. It is shatter resistant and will not soften over time. It is resistant to humidity and temperatures over 300°F. Polycarbonate is virtually unbreakable, making it safe to use in areas where it may be exposed to impact.

The transparency allows the viewer to see content, read text, and see true colors through the material.

Care and Cleaning

Resistant to stains, polycarbonate is easily cleaned with common cleaners or soap and water. Alcohol is recommended to remove grease or oil. Ammonia and acetone should not be used.

Product Description:

- Protective Barrier - Pass Through Opening - XLarge
- Support legs insert into barrier for portability and quick setup
- Pass through opening at bottom measuring 12.00"W x 5.00"H
- Disassembles for flat storage
- Clear Polycarbonate Plastic

Primary Area for Product Usage:

- Anywhere a protective barrier is needed

Package Specifications:

- Package Quantity: 1 per case
- 34"L x 5"W x 41"H (86.4 cm x 12.7 cm x 104.1 cm)
- 12.0 lbs (5.4 kg) - approximated

Product Specifications (overall external dimensions):

- 36.00"W x 31.00"H x 11.50"D (91.4 cm x 78.7 cm x 29.2 cm)
- 9.8 lbs (4.4 kg) - approximated

Mounting Instructions:

- Fit legs to barrier by matching slot cutouts and sliding together.
- Disassemble for flat storage.
