Care and Construction

ABS Plastic

Material Characteristics

Designed for Long-Term, Heavy-Duty Applications

The combination of copolymers (Acrylonitrile, Butadiene, and Styrene) gives ABS an excellent combination of strength, rigidity, and toughness. The fauxwood finish is ARVINYL laminate created from a semi-rigid film.

ABS is chemical and stress-crack resistant. It is tough, dimensionally stable, and will hold up to long-term use. To ensure product longevity, fauxwood products should not be mounted in very hot or cold areas.

Care and Cleaning

Use mild soap and water to clean. Petroleum-based oils, solvents, and paints should not be used.

Standard hospital cleaning supplies are approved for use on our ABS plastic products.
