Razor® 20 & 20T

The Razor® 20 and 20T – A Cut Above

The Razor® 20 and Razor® 20T are classic Kent products: easy to operate, built to last, intelligently designed and environmentally conscious. Onboard battery charging, no-tool squeegee blade replacement and an easy-to-clean recovery tank make the Razor 20 and 20T easy to maintain, as well.

Anything but basic, the Razor 20 and 20T also feature the kind of time and resource saving features that are a cut above traditional scrubbers. The Razor 20 and 20T are equipped with Kent's ECO System™. The ECO System automatically controls solution usage, resulting in maximized productivity– over a full hour of cleaning on a single tank. Users will also appreciate the Razor's two pad pressure settings, enabling operators to switch effortlessly between a run time extending floating head and a fixed head for heavier soil cleaning. And thanks to quiet operation, you can take advantage of all these features day or night.

The Razor 20 is propelled by the rotation of the scrub head, while the Razor 20T features a traction drive system with variable speed control. Scrubbing, climbing ramps, and transporting have never been easier, either in forward or reverse. The Razor 20T is equipped with a safe and ergonomic paddle with fingertip control. The added ease of mobility on the Razor 20T translates into increased efficiency, operator comfort, and operator safety.

Tank cover opens to allow full access for cleaning out recovery tank

Ergonomic, wrap-around handle for operator comfort

Standard splash skirt

Variable pad driven assistance

ECO System™ setting is designed for high productivity cleaning

Pad pressure is set in either 'float' or 'locked' position
