

# Back Vac™ 6 & 10

## Back Pack Vacuums

The Euroclean canister Back Vac™ is helping cleaning staffs everywhere become a little more comfortable with the idea of power.

Like the Euroclean Hip Vac™ before them, the Back Vac products take the concept of comfort very seriously. The Euroclean Weight Management System™ (WMS) Harness gently hugs the contours of the human form, regardless of the operator's size or shape. Better fit results in better control, greater range of movement and better distribution of weight. When properly adjusted, the WMS Harness reduces operator fatigue and increases productivity. The harness also features a series of convenient storage loops perfect for keeping tool attachments within reach. Our exclusive "no tug" cord restraint clip reduces stress on the power cord, contributing to a longer operating life.

Although the Back Vac weighs in at less than 11 pounds, it's far from a lightweight in the power department. With 144 CFM of airflow and 99 inches of static lift, the Back Vac packs a serious wallop. A strategically placed exhaust port directs exiting warm air up and away from the operator. And, in spite of all that power, the Euroclean Back Vac is as easy on the ears as it is on the back. Its category leading 62 dB A and lower-pitched voice enables operators to clean during business hours. Four levels of filtration keep floating particulates to an absolute minimum, and both units can be quickly and easily upgraded with H.E.P.A. filtration. And, Euroclean's "Fold n Seal™" bag system keeps dirt and dust where they belong... in the bag.

## The Back Vac™ 6 & 10 models are perfect for...

- Education Buildings
- Office Buildings
- Libraries
- Health Clubs
- Airports / Train Stations / Bus Depots
- Daytime Cleaning
