

OB-3650/3650B/3650C/3650M

ObboMed® Medical Air Mattress

Suitable for Stage 1-4 Pressure Ulcer

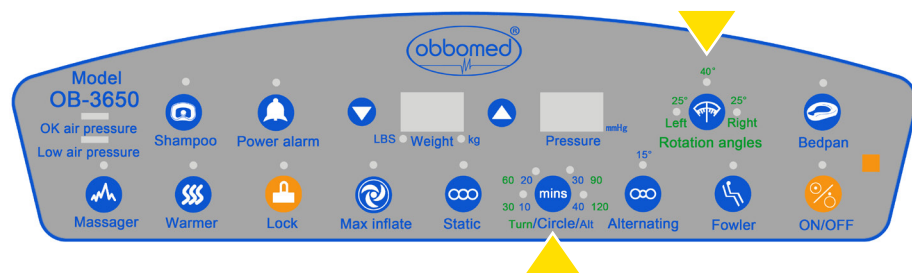

ObboMed® UltraAir™ Mattress

10" Alternating • Multiple Angle Rotation (15°/25°/40°) • Low Air Loss • Bedpan • Shampoo
Warmer • Massager • Inflatable Guardrail • Side Bolster • 24-hour Power Outage Protection

The ObboMed® difference—

Comfort, Safety & Ease

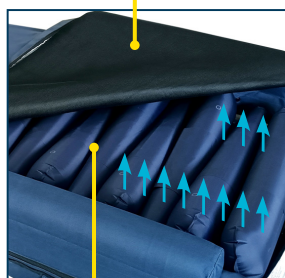

User friendly control panel basic functions:

- On/Off (Standby)
- Lock
- Max Inflate (Auto Firm)
- Static Mode
- Fowler (Seating)
- Weight and Pressure Display
- Low Air Loss up to 23 LPM
- Audio and Visual Warning Signals (if power outage and/or when air pressure is too low)
- 24-hour Power Outage Protection (bottom layer stays inflated if air hose remains connected to Control Unit)
- Multiple Rotation Angles (15°/25°/40°)
- Alternating Cycle Time: 10/20/30/40 Min (system defaults to "Alternating" mode automatically after Max inflate or 1-hour in Static Mode)
- Rotation Circle: 10/20/30/40/60/90/120 Min

Features of ObboMed's multi-layered mattress:

- Designed to minimize friction and shearing of the skin
- Vapor permeable to facilitate moisture removal into the airflow away from the mattress
- Perspiration vacates through the mattress cover surface and/or the patient's bed boundary
- Antimicrobial, Liquid resistant, Fireproof
- Latex, lead, and mercury-free
- Below the cover layer, vapor flows out with the Low Air Loss feature to lower humidity under the patient while simultaneously transferring away moisture and heat
- Air cells are composed of a combination of thermoplastic polyurethane (TPU) and nylon and heat-melt airtight with ultrasonic high-frequency, and are liquid proof and machine washable

Top cover with quilted underside

15° Self-Rotation by specially designed air cells. Low Air Loss up to 23 LPM plus 820L Air flow fan.

OB-3650 MATTRESS DIMENSION AND WEIGHT SPECIFICATIONS

2-layer Air Cell, 10"H Mattress, 10"H Side Bolster, 4"H Patented Guardrail, Total 14"H

3650 Mattress Dimension: 80"L x 36"W x 10-14"H

3650C Mattress Weight: 30.0 lb

3650M Pump: 50 LPM

Weight Capacity: 800 lbs

Control Unit Weight: 18.5 lbs

Unit Package Weight: 52.9 lbs

Unit Package Dimension: 19.3"L x 16.9"W x 27.6"H

3650B Mattress Dimension: 80"L x 42"W x 10-14"H

Mattress Weight: 33.0 lbs

Pump: 50 LPM

Weight Capacity: 800 lbs

Control Unit Weight: 18.5 lbs

Unit Package Weight: 58.4 lbs

Unit Package Dimension: 19.3"L x 16.9"W x 33.5"H

Mor-Medical International in Partnership with ObboMed Medical Air Mattress

Patented UltraAir™ Features*:

15° Self-lateral Rotation: This feature has specially designed continuously alternating air cells creating a gentle, wave-like motion that provides a subtle rotation. This therapy aids in redistributing the user's weight to alleviate pressure points while stimulating blood flow. The subtle motion also helps improve sleep.

Multiple Rotation Angles (15°/25°/40°): Angle options help meet unique demands for patients who suffer from pulmonary conditions.

"Easy Go" Bedpan: One push of a button creates a recessed opening in 20 seconds to receive a bedpan on the top cover. Push button again to quickly restore the recessed mattress top cover. Only one caregiver is needed to perform this bedpan function. No need to move patient.

"Easy Go" Shampoo Basin: One push of a button quickly creates a recessed opening in 20 seconds to receive a shampoo basin on top cover. Push button again to quickly restore the recessed mattress top cover. Only one caregiver is needed to perform the shampoo basin function. No need to move patient.

Inflatable "Air Filled" Guardrail: Inflatable 4"H guardrails offer soft and flexible yet strong support to protect against falls, bumps and collisions. They also help prevent the body from getting stuck between the mattress and guardrails.

Vibration Massager: A microprocessor supports massage modes. Subtle but deep massage can ease pain, reduce tension, increase metabolism, help to expectorate phlegm and reduce muscle fatigue.

Warmer: Soothing and relaxing heat is distributed along the patient's back directly above the alternating air cells. This reliable source of warmth helps support the immune system and improve circulation.

* For details on these patented features, visit obboMed.com/patents

Additional UltraAir™ Functions:

Side Bolster

25°/40° Right/Left/Auto Rotation

Low Air Loss feature **plus 820L Air flow fan**

Sinking feature lowers to 4" deep plus the 4" inflatable guardrail **creates an 8" deep soft barrier** to keep patient centralized and prevent falling off bed during rotation

Limited Warranty:

1 year for Top Cover, 2 years for Control Unit and Mattress
