

Effectively Remove Unwanted Pet Stains and Odors

Pet Urine Odor & Stain Eliminator is an advanced biological formula designed to eliminate tough, stubborn pet problems. Active enzyme producing bacteria work to permanently eliminate odors, not just cover them up.

DIRECTIONS FOR USE

Shake well before using. Test on all surfaces in an inconspicuous area before using. If surface discolours, fades or fiber color transfers to a white cloth, do not use.

For Carpets, Upholstery, Clothes:

Fresh Urine

1. Remove as much of the pet urine as possible by using an extraction machine, paper towels or a highly absorbent cotton towel.
2. Pour 4-6 oz. (117-176 ml) of fresh, warm WATER on the accident area. Extract this water from the carpeting. DO THIS STEP 2-3 MORE TIMES.
3. Apply Natural Touch to the affected area. Make sure you use enough product to wet the area well.
4. Allow Natural Touch to sit for 5-10 minutes. The bacteria will begin feeding and reproducing.
5. Extract or absorb as much of the bacteria product as possible... and allow area to air dry.

Helpful Hint: Fold an old towel several times and lay over treated area. Place a heavy weighted object on top of the towel. The residual liquid will wick into the towel as it dries.

6. Vacuum and inspect treated area when dried. Odor should be gone. If not, simply repeat procedure.

NOTE: For older urine stains and odors, several applications may be necessary. Repeat steps.

For Reappearing Stains:

Repeat Steps 1-3; then place a clean, white cloth over the treated area, followed by placing a weighted object on the towel. Wait until the towel absorbs excess stain residue and moisture that wicks to the top.

For more information on Urine Removal visit www.nilodor.com

Helpful Hint: Cover area with a clean, dry towel and place a weight on top of the towel. The liquid will wick into the towel as it dries, instead of stopping at the top of your carpet fibers. Once dried, vacuum and inspect treated area. Odor should be gone. If not, repeat procedure.
