

Plastic & China Destainer

Portion Control Packets

Free-flowing oxygenated powder in portion control packet packaging for presoaking plastic ware and china. Stable oxygen-bleaching action effectively removes soils, stains, and film from a variety of surfaces. Plastic & China Destainer will not attack plastic ware, china, or harm colors. Noncorrosive - contains no abrasives. Use as a presoak to remove stains such as coffee, tea, and juice. Low foam will not interfere with dish machine operation. Excellent for removal of metal marks from regular dishware.

DIRECTIONS

Read the entire label and SDS for proper use, handling and storage before using this product.

For soaking in stainless steel sinks or plastic bus trays:

1. Dissolve 1 full 4 oz. packet into 2 gallons of warm water.
2. Dissolve completely before adding tableware into solution.
3. Soak between 5-15 minutes depending on soil level. For heavy soils or stubborn stains, allow to soak overnight.
4. Remove and wash in a normal manner either by hand or in a dish machine.
5. Scrub stain if necessary.
